

What's New in Base Followers

We are excited to introduce the latest enhancements to Spline Plus, bringing more power and flexibility to your projects. Here's what's new:

- **Base Followers (Free and Included in Spline Plus Core):**
The new Base Followers modifier is now available and free to use with the Spline Plus Core. This feature allows you to easily manage and animate followers along your spline paths.
- **Innovative Events System (Requires Spline Plus Animation Package):**
We've developed a robust and intuitive events system that is simpler and more innovative than ever. Please note that this system is not included in the free package; it's available exclusively with the Spline Plus Animation package.
- **Multithreading Support for Base Follower Animation:**
Base follower animations now support multithreading, in addition to single-threading, for improved performance and smoother animations.
- **Optimized Core System:**
The core system has been extensively optimized to deliver better performance across the board, ensuring your projects run more efficiently.
- **Enhanced Keyboard Navigation at Intersection Nodes:**
Navigate intersections more easily with our improved and smarter keyboard navigation system.
- **Speed Smooth Transition System:**
Enjoy smoother transitions with the newly added speed smooth transition system.
- **Advanced Navigation at Intersections:**
Benefit from both random and keyboard-based navigation options at intersection nodes, giving you more control and flexibility.
- **Automatic and Keyboard-Controlled Base Follower Animation:**
Base follower animations now support both automatic and keyboard-controlled options, providing versatile ways to control your animations.
